Experiment 9: AI and Analytics with Zia and Dashboards

Aim

To use Zia and analytics features on the gym enrollment data.

Theory

Zia Build Agent can create or change application components from a description. Analytics is provided by reports, charts and dashboards. In this project the application was built with Zia assistance and analysed through a KPI and chart dashboard.

Procedure

1. Describe the gym application to the Zia Build Agent and review the generated fields.
2. Open the Gym_Enrollment_Dashboard.
3. Use the count panel and plan-wise chart to read the enrollment data.

Output

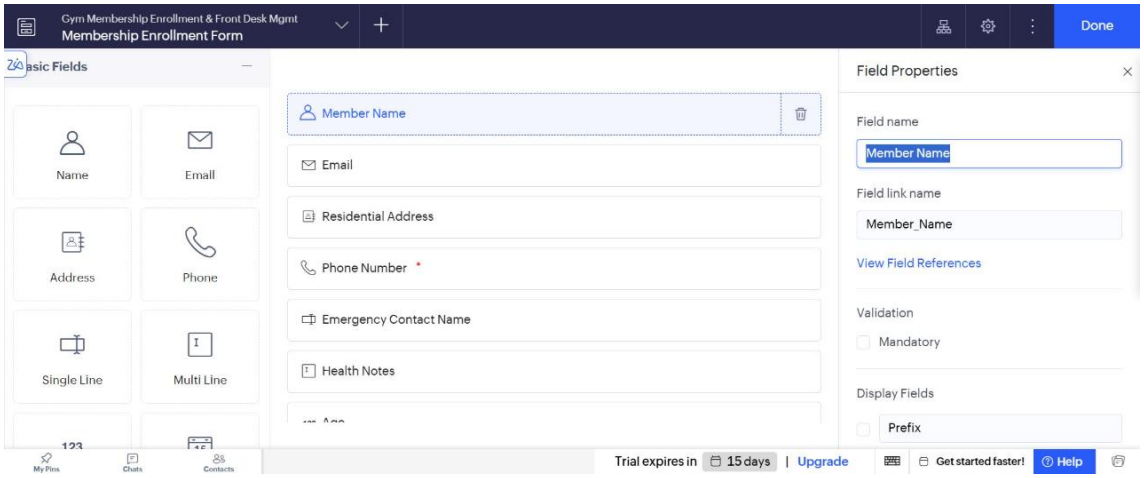

Fig 9.1 Application form built with Zia assistance

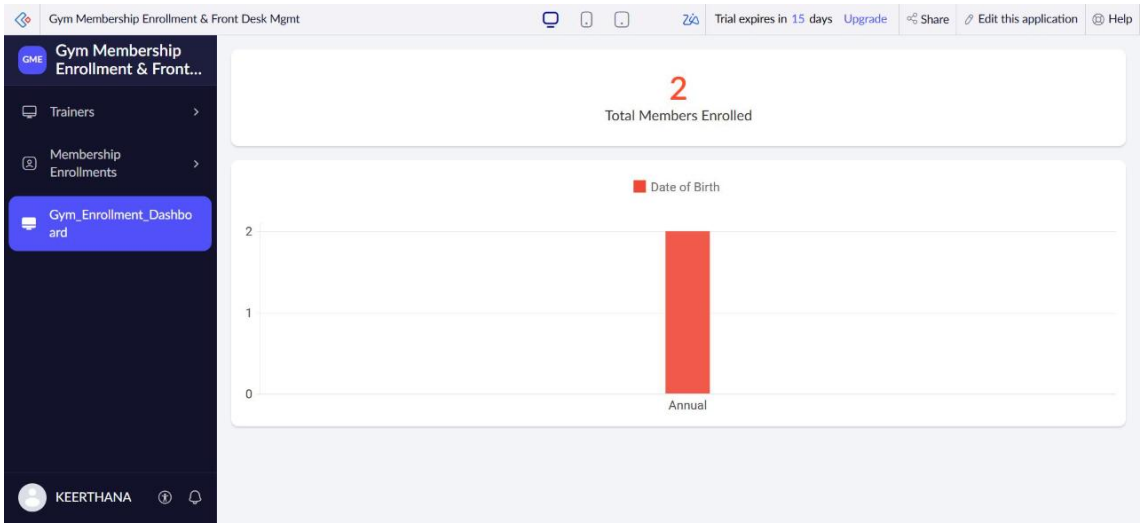

Fig 9.2 Analytics dashboard

Result

Zia and the dashboard were used to build and analyse the gym application.
