Experiment 12: Security and Governance

Aim

To apply security and governance to the gym application using mandatory fields, permission sets and roles.

Theory

Member data such as health notes and the digital signature must be protected. Security is applied through mandatory fields, permission sets, roles and data sharing rules.

Procedure

1. Mark Requires Personal Trainer and Member Digital Signature as mandatory in the form builder.
2. Create the Front Desk Staff permission set with limited access.
3. Create the Front Desk role under CEO.
4. Review the Data Sharing tab for record visibility.

Output

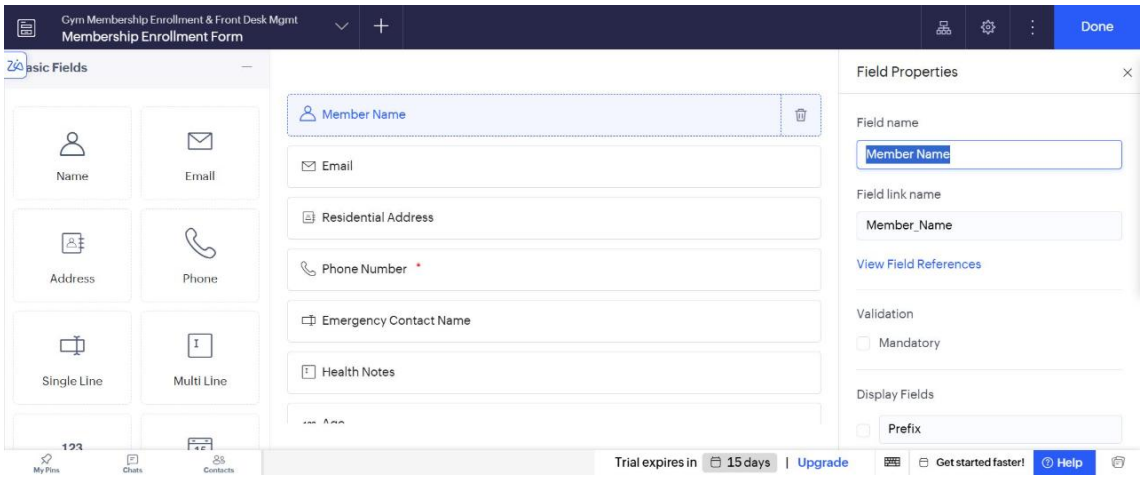

Fig 12.1 Form builder with mandatory fields

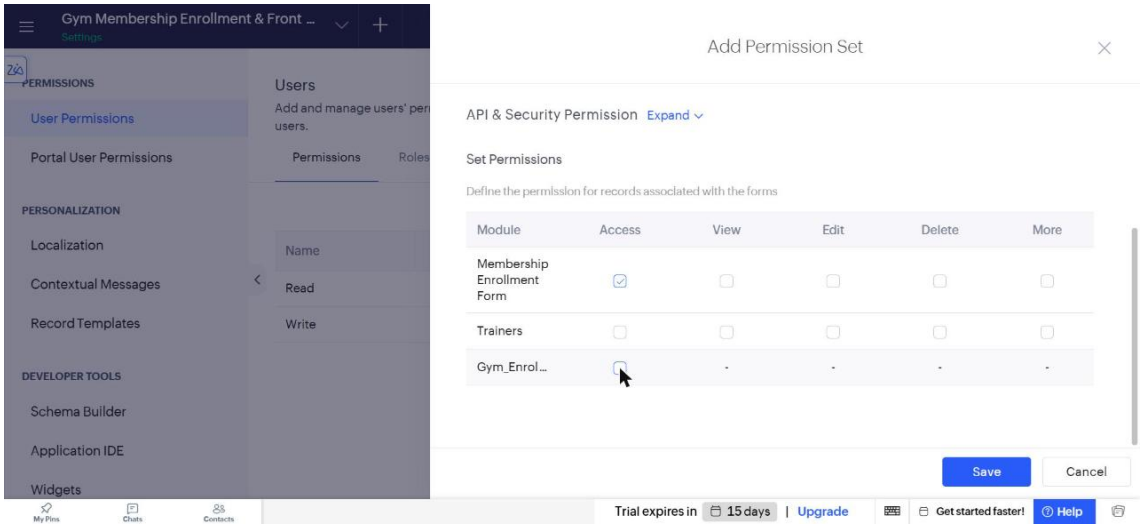

Fig 12.2 Permission set

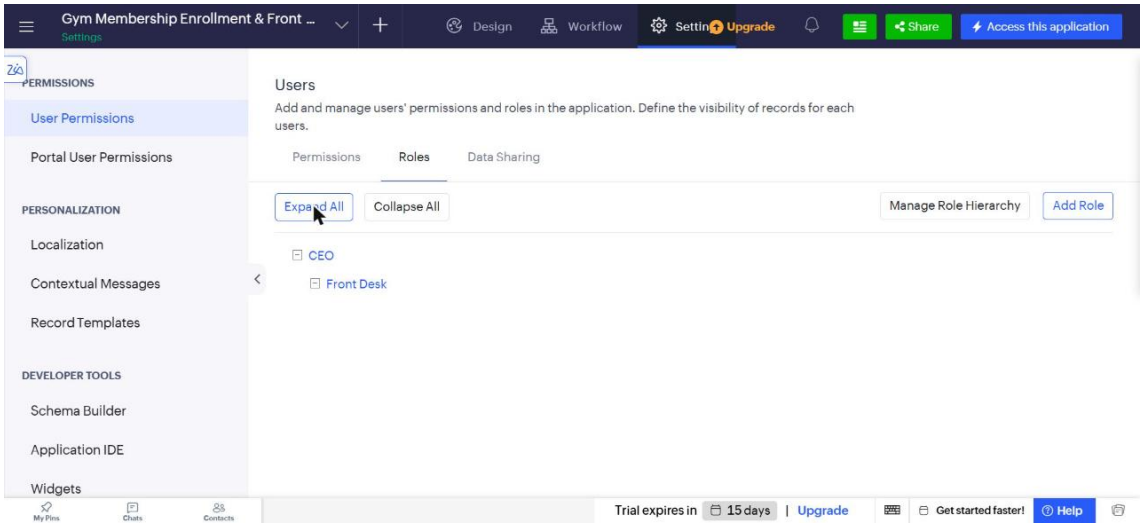

Fig 12.3 Role hierarchy

Result

Governance was applied through mandatory fields, a permission set and a role.
